Annex 1 to certificate no. 341/21

Definition of processing activities

vivoAlbums is a tool for the user to browse and edit photos and videos on a mobile terminal. It's mainly used to check the photos taken or saved by the user, edit the pictures and videos, and manage the pictures and videos by category.

Following editing functions are included:

1. Intelligent adjustment, frame (poster-downloading function), sticker
2. Add the downloading function to frames, light effect, pixelation, painting

The video editing functions:

1. AI clipping: Automatically filters video clips and uses the template theme to automatically generate a vlog
2. Theme (Download the template theme)
3. Music (online downloading)
4. Video clipping through established tracks to make video clipping efficient
5. Editing text through established tracks ensures that any time can be chosen for adding text
6. The video playing speed can be any speed within 0.1-4 times the previous speed

Annex 2 to certificate no. 341/21

Excluded processing activities

The website of vivo as well as any other registration possibility of the user on the device or app installed on the phone interacting with the app were not subject to the evaluation.
