## **Annex 1 to certificate no. 386/22**

### **Definition of processing activities**

Huawei Assistant provides local and cloud services in a compact application. Assistant today is an app for Huawei devices which serves as a dashboard. The app offers various built in widgets / functions (like displaying news) but can be expanded to include third party apps and display information from those apps (stocks, reminders, flights etc.).

The scope of this evaluation is limited to the version of Assistant Today as it is provided by Aspiegel to users in the European Union (EU)/European Economic Area (EEA).

The following functions are subject to this evaluation:

- **Instant Access:** Users can bind functions to buttons to gain a quick access.
- **Greetings:** Provide local and online greetings which change every time when you slide in Assistant.
- **News:** Provide news in the form of pictures, atlases and short videos.
- **Ads:** Providing personalized advertises for users.
- **Smart Care\_Moments:** The system will recommend relevant service cards according to the user's event or behavior data.
- **Push Data to BI:** Reporting user behavioral data and carrying out statistical analysis.
