final audit day: 13/09/2020

next planned monitoring by 13/09/2022

period of validity: 14/09/2020 – 13/09/2022

Annex 1 to certificate no. 307/20

Definition of processing activities

rPad provides live detection with a precise medical-grade infrared thermal imaging sensor. An individual who walks up to the pad will have their temperature detected along with any Personal Protective Equipment (PPE).

The pad allows users to experience a touch-less interaction to allow for workplaces to prevent the spread of germs. The rPad has a fast and reliable facial recognition algorithm that is best for workplace environments. And in conjunction with the Thermal Kit, the rPad is a device that allows thermal body temperature to be measured.

Annex 2 to certificate no. 307/20

Excluded processing activities

The evaluation relates only to the product mentioned in annex 1 and thus also only to the processes in which Remark is involved.
