CERTIFICATE

no. 528/26

ePrivacyseal GmbH
Burchardstr. 14, 20095 Hamburg, Germany

hereby certifies* that

as determined in the certification decision of 09 February 2026

Xovis Germany
Ullsteinstr. 140, 12109 Berlin, Deutschland

operates its products or services

“APS-B, APS-R, APS-R-POE, APS-R-POE-PP”

version as available 22 January 2026

as defined in annex 1 and to the exclusion of the processing activities in annex 2 to this certificate.

final audit day: 09/02/2026

next planned monitoring by 29/01/2027

period of validity: 30/01/2025 – 29/01/2027

The certification decision takes place under the validity condition described in Annex 3
and in conformity with the criteria catalogue for the “ePrivacyseal EU” (version 3.0 of May 2022)
of ePrivacyseal GmbH.

Annex 1 to certificate no. 528/26

Definition of processing activities

Xovis designs, manufactures and sells 3D people counting sensors. Xovis customers buy, integrate and/or operate these devices on their premises, to which the general public (e.g. shopping malls, airports, busses, trains or similar) or other, more narrowly defined groups of persons (e.g. employees in office spaces), have access.

The specific type of end-customer notwithstanding, Xovis does neither own nor operate sensor devices once they have been sold and were mounted in the target environment. In analogy, this applies also to the data captured and transmitted by these sensors to the technical systems of their respective owners. Installation and maintenance operations are either performed by integrators/operators or, in some cases, by Xovis personnel who, on request, act on their behalf. To this end, personnel interact with the sensor devices over a network. Moreover, sensor data can also be transmitted to other technical systems. In all of these situations, the superordinate system, the sensors which form part of it and the corresponding environment (e.g. building) are under the full control of the customer (i.e. not owned or controlled by Xovis).

Annex 2 to certificate no. 528/26

Excluded processing activities

- All processing carried out by the controller, Xovis' customer, are out of scope.
- Operating modes of the sensor that transfer video or image data outwards
- XOVIS Product Improvement Program & Device Diagnostics
