*ePrivacyseal GmbH is not an accredited certification body within the meaning of art. 42(5) GDPR.

Annex 1 to certificate no. 537/26

Definition of processing activities

There have been no changes to the product or the relevant data processing activities since the last review.

Album is a tool for the user to browse and edit photos and videos on a mobile terminal. It's mainly used to check the photos taken or saved by the user, edit the pictures and videos, and manage the pictures and videos by category.

Following editing functions are included:

1. Intelligent adjustment, frame (poster-downloading function), sticker
2. Add the downloading function to frames, light effect, pixelation, painting

The new video editing functions:

1. AI clipping: Automatically filters video clips and uses the template theme to automatically generate a vlog
2. Theme (Download the template theme)
3. Music (online downloading)
4. Video clipping through established tracks to make video clipping efficient
5. Editing text through established tracks ensures that any time can be chosen for adding text
6. The video playing speed can be any speed within 0.1-4 times the previous speed

No Data (including IP and IMEI) and no fotos or videos ever leave the device.

This also applies for AI clipping and all other functions, even if AI is involved, this only happens locally on the device an no data is sent ouf of the device.

Annex 2 to certificate no. 537/26

Excluded processing activities

This evaluation refers only to the above mentioned product and therefore only to the processes in which Vivo Tech GmbH and its customers are involved.

Out of Scope:

1. The Website of vivo
2. any functions to share photos or videos
3. any other app installed on the phone interacting with the app
4. any other function interacting with the app or used by special functions of the app (like adding location data with Google Services)
5. any function that might include data leaving the device
6. Data transmission or other connections to third parties
